$$X = M N_X .$$

$$K_c = X \left(\frac{\bar{W}}{e}\right)_w = M N_X \left(\frac{\bar{W}}{e}\right)_w$$

修正. 水中受宽束减弱. $K_c = A_{eg} M N_X \left(\frac{\bar{W}}{e}\right)_w .$

关联至空气的吸收剂量.

$$(K_c)_{water} = (K_c)_a \underbrace{\left(\frac{\mu_{en}}{\rho}\right)_a^{water}}_{\text{水与空气的比值}}$$

$$N_{gas} = \frac{D_{gas} A_{ion}}{M} \qquad D_{gas} = \frac{M N_{gas}}{A_{ion}}.$$
